WHAT IS IT

LIFE for **“SHIELD NUTRITION”**.

Hepatoprotector, detoxifying, designed to defatigate the liver work. Recommended in case of food transitions, stress, contaminated foods (eg. from mycotoxins). Ideal also for highly productive animals or groups to contain steatosis and support the hepatic metabolism.

BENEFITS PROVIDED

- Choline RP, associated with betaine, has an important antichetogenic and antisteatotic protective function at the hepatic level.
- Increases ingestion and improves liver function
- Improves the health of intestinal villi thanks to MOS.
- Lightens the work of the liver caused by endotoxemia of food or ruminal origin in case of alterations of fermentation and release of endotoxins.
- Intrinsic detoxification by extra-hepatic transport of fats outside the liver
- In case of clinical or subclinical ketosis it relieves liver suffering and related pathologies.

HOW TO USE IT

From 100 to 200 gr/head per day depending on milk production and rationing. Follow the indications of our technical service.
