WHAT IS IT

Product of excellence against heat stress in cows. It combines a buffering and rehydrating effect with a strong anti-inflammatory action, stimulates ingestion and improves feed efficiency. It contains eight additives that act both on the immune system, on the inflammatory state and on the intestinal permeability, ensuring an effective action against heat stress.

BENEFITS PROVIDED

- The RP choline, associated with betaine, plays an important function antichetogenic and antisteatogenic at the hepatic level.
- Increases ingestion and improves liver function
- Modulates the immune response and acts on non-specific immunity
- Carries out an anti-inflammatory and antioxidant action.
- Maintains ingestion and supports milk production.
- Increases drinking frequency due to enteric vaso-active properties.

HOW TO USE IT

From 100 to 200 gr/day depending on the degree of stress and the THI value. Follow the indications of our technical service.
